

Engineering America

A Wise Decision

United Dairymen of Arizona (UDA), Tempe, Replaces Epoxy Painted Tank with Aquastore® Glass-Fused-to-Steel

United Dairymen of Arizona contracted Engineering America to demolish an 11-year-old epoxy painted tank and replace it with an Aquastore glass-fused-to-steel 99,000 gallon tank. The tank installation was completed in August 2010 and is UDA's second Aquastore tank. Their first tank was built in 2002.

The tank will store reuse water from UDA's reverse osmosis/polishing process.

Special thanks to Keith Murfield, CEO; Mike Billotte, Vice President; and Steve Baxley, Plant Engineer who worked exclusively with Engineering America.

“The tank went in on schedule and on budget in a very difficult spot with very limited access. The folks from Engineering America have been a pleasure to work with and we are now planning our next new tank.”

Steve Baxley, UDA

**Engineering America wishes you
all good health, happiness and
prosperity in the new year.**

Specify quality, experience and low maintenance. Specify Aquastore® glass-fused-to-steel tanks. For more information, call Engineering America: MN **651-777-4041**, KS **913-782-7774**, CO **970-962-9400**, AZ **480-895-1106** or visit us online: www.engamerica.com.

New Aquastore 20' D x 44' H
99,000 gallon tank

Remains of old epoxy
painted tank

In 1980 we made an innovative promise that our tanks would never need to be painted. No Aquastore® tank has been painted since – we are the authentic glass-fused-to-steel!
