## Sundance, Wyoming, Comes Back to Engineering America and Aquastore® for Another Glass-Fused-to-Steel Beauty

Installed: 2010  
Tank Type: Aquastore® Glass-Fused-To-Steel  
Storage Capacity: 250,000 Gallons  
Engineers: Bearlodge Limited, Inc.  
Contractors: Engineering America

### PROJECT OVERVIEW:

In 2001 construction was completed on the City of Sundance, Wyoming's first Aquastore glass-fused-to-steel tank. Happy with the results, in October of 2009 the city chose Aquastore again when it needed to replace an old welded steel tank with a smart long-term investment. The glass-fused-to-steel technology of this new Aquastore tank provides a superior life cycle with minimal maintenance.

The American Recovery and Reinvestment Act of 2009 (ARRA) allowed the necessary funding for Sundance to proceed with the new project in the spring of 2010, with construction by general contractor Engineering America. The project consisted of installing approximately 1,047 feet of 10-inch PVC waterline, 167 feet of 8-inch waterline, a 250,000 gallon

Specify quality, experience and low maintenance. Specify Aquastore® glass-fused-to-steel tanks. For more information, call Engineering America: MN **651-777-4041**, KS **913-782-7774**, CO **970-962-9400**, AZ **480-895-1106** or visit us online: [www.engamerica.com](http://www.engamerica.com).

**In 1980 we made an innovative promise that our tanks would never need to be painted. No Aquastore® tank has been painted since – we are the authentic glass-fused-to-steel!**
