

Engineering America Announces Channel Partner Agreement with CST Storage

OAKDALE, MINNESOTA (July 11, 2011) – Engineering America (www.engamerica.com) is pleased to announce that it has entered into a select channel partner agreement with CST Storage, a division of CST Industries, Inc. The company will market, construct and support CST products, including storage tanks, covers and domes, to a 15-state region in the United States.

**Tony Belden, President and CEO of Engineering America
with Steve Westfall, President of CST Storage**

CST Storage (www.cst-storage.com) is the world's largest supplier of turnkey solutions for above-ground liquid and dry storage, including glass-fused-to-steel bolted storage tanks, factory welded and coated epoxy tanks, as well as aluminum domes and custom structural covers.

"The select channel partner agreement with CST Storage is a significant step in Engineering America's continued commitment to provide our customers with the most comprehensive offering of liquid storage solutions available," said Tony Belden, president of Engineering America. "CST Storage has a long-standing reputation of providing best-in-class storage solutions that we are proud to represent to our customers."

Engineering America serves the states of Minnesota, North Dakota, South Dakota, Wisconsin, Iowa, Colorado, Utah, Wyoming, Kansas, Missouri, Nebraska, Arizona, New Mexico, Montana and Nevada.

"Engineering America is known throughout the industry for excellent product knowledge and superior construction, customer service and support," said Steve Westfall, president of CST Storage. "We look forward to joining forces with this exceptional company to become the most complete storage tank solution provider in the market."

Together, Engineering America and CST Storage will provide a complete selection of above-ground storage solutions for liquid storage applications in a variety of municipal, industrial and commercial markets. These include tanks designed for water, wastewater, petroleum, fire protection and a variety of industrial liquid applications.
