

It's perfectly CLEAR...

...Paint by any other name is still just paint.

Glass-Fused-to-Steel (Porcelain Enamel) is:

- A single, strong, integrated porcelain enamel and steel material fused together at over 1500 degrees F
- An inert, inorganic coating that NEVER needs painting

Glass-Fused-to-Steel is not:

- Mechanically bonded coating that needs painting every 10-15 years
- An organic coating that begins to deteriorate starting day one after installation

Proven for over 60 years – the technology is so robust that a service expiration date is yet to be determined. Don't be fooled by claims that paint and other paint-like coatings are better than glass.

If it's NOT fading,

If it's NOT chalking,

Then it's not paint.....it's Glass !!

Specify quality, experience and low maintenance. Specify Aquastore® glass-fused-to-steel tanks. For more information, call Engineering America: MN **651-777-4041**, KS **913-782-7774**, CO **970-962-9400**, AZ **480-895-1106** or visit us online: www.engamerica.com.

In 1980 we made an innovative promise that our tanks would never need to be painted. No Aquastore® tank has been painted since – we are the authentic glass-fused-to-steel!
