Water and Wastewater Treatment Systems

AEROMIX is a world leader in Pre-Engineered Package and Field-Erectable wastewater treatment plants, and compact potable water plants, from 1,000 to several million gallons per day.

AEROMIX plants can be found in North and South America, in the Middle East and the Far East. They serve a few hundred people to thousands of people at hotels and resorts, shopping centers and office buildings, at industrial and military facilities, and at small and medium-sized municipalities.

PROJECT SPOTLIGHT: US ARMY CORPS OF ENGINEERS, CAMP VICTORY

AEROMIX has been involved in the reconstruction of Iraq, Afghanistan, and in many Water and wastewater treatment projects in the Middle East. In 2006, we had the privilege of working with the US Army Corps of Engineers (USACE) and supplied packaged wastewater treatment plants to treat 2 million GPD of wastewater. The USACE was so impressed by the equipment AEROMIX supplied to Camp Victory's wastewater treatment plant, they posted a video about the project on their Gulf Region Division website. Please see our 60 second video featuring the USACE project: Reconstruction of Camp Victory Base in Baghdad, Iraq: www.aeromix.com/treatment_systems.php
